COMPANY PROFILE

ABOUT THE COMPANY

Since 2008, DL Fluid Power Company. has been a trusted manufacturer and distributor of hydraulic components, serving construction, mining, agriculture, and manufacturing industries. We specialize in hydraulic fittings, pipe clamps, hoses, valves, pumps, and power pack accessories, delivering durable and efficient solutions.

VISION

From humble beginnings in 2008, we have grown into a recognized name in hydraulic solutions, driven by a commitment to quality, innovation, and reliability. Our vision is to empower industries worldwide with high-performance hydraulic products, enhancing efficiency, safety, and sustainability while continually evolving to meet the demands of a dynamic market.

MANUFACTURED PRODUCTS

1. Pipe clamps

Our pipe clamps are designed for secure and efficient support in industries such as marine technology, oil & mining, and automobiles. Manufactured in accordance with DIN-3015 standards, they feature a ribbed structure for impact resistance and vibration dampening, ensuring durability. Their design provides strength along the tube axis, offering a high degree of sound reduction. We offer plastic polyimide and aluminum clamp bodies with steel or stainless-steel plates and bolts for varied applications. Our range includes Standard Clamps, Heavy-Duty Clamps, Twin Clamps, Aluminum Clamps, and Rail Nut Clamps, catering to diverse industrial needs.

2. Hydraulic Tube Fittings

Our hydraulic fittings are built for precision and reliability, ensuring strong, leak-proof connections across various applications. We offer a range of fittings tailored for different pressure requirements and environments. Series LL is ideal for lubrication and low-pressure hydraulic applications, while Series L serves automotive, compressed air systems, fuel heating, hydraulic return lines, and small refrigeration equipment. For heavy-duty machinery, mining, shipbuilding, and high-pressure applications, our Series H fittings provide exceptional durability and performance. Engineered for strength and reliability, our fittings ensure optimal efficiency and long-term safety in every use.

2. Hydraulic Hose

We provide a high-quality range of hydraulic hoses designed for industrial and heavy-duty applications. Engineered for durability and efficiency, our hoses cater to industries such as construction, agriculture, and manufacturing. Built to SAE and DIN standards, they ensure optimal performance and safety in demanding environments. Available in R1 to R13 grades, our hoses are tailored to withstand various pressure and temperature conditions. To accommodate diverse system requirements, we offer a wide selection of threading sizes, including BSP, Metric, and UNF, ensuring seamless integration and reliable performance.

DEALERSHIPS & DISTRIBUTORSHIPS

Highlighting our partnerships with leading brands and manufacturers in the hydraulic industry.

TRADING PRODUCT RANGE

We specialize in the trading and distribution of premium hydraulic components, providing reliable solutions for various industrial applications. Following are the types of products we offer.

1. Seamless pipes & tubes as per DIN 2391
2. Hand pump
3. Gear pump
4. Axial/ Radial piston pumps
5. Hydraulic cylinders
6. Lubrication pumps, motorized units, lubrication pipes & Fittings.
